

Plug  
& Play

# THREE WAY VALVE

Pre-assembled solar heating system for swimming pools

The Beniferro automated 3-way will direct the water in a solar heating to the EPDM heating system to the correct direction. Our valve is unique : the tension on the rotating ball is set in our factory, so that the valve always turns easily, hence preventing valve blockage and motor breakdown.

The valve can best be purchased pre-installed with our Benisol temperature controller. A wifi controlled valve is also available

**Robust  
design.  
Delivered  
plug and  
play**

## Characteristics

Free heat of the sun

50-75% of pool surface  
in solar heating gives 4-8 °C  
temperature rise.

Robust design

Connection to 50mm  
tube diameter

## Optional

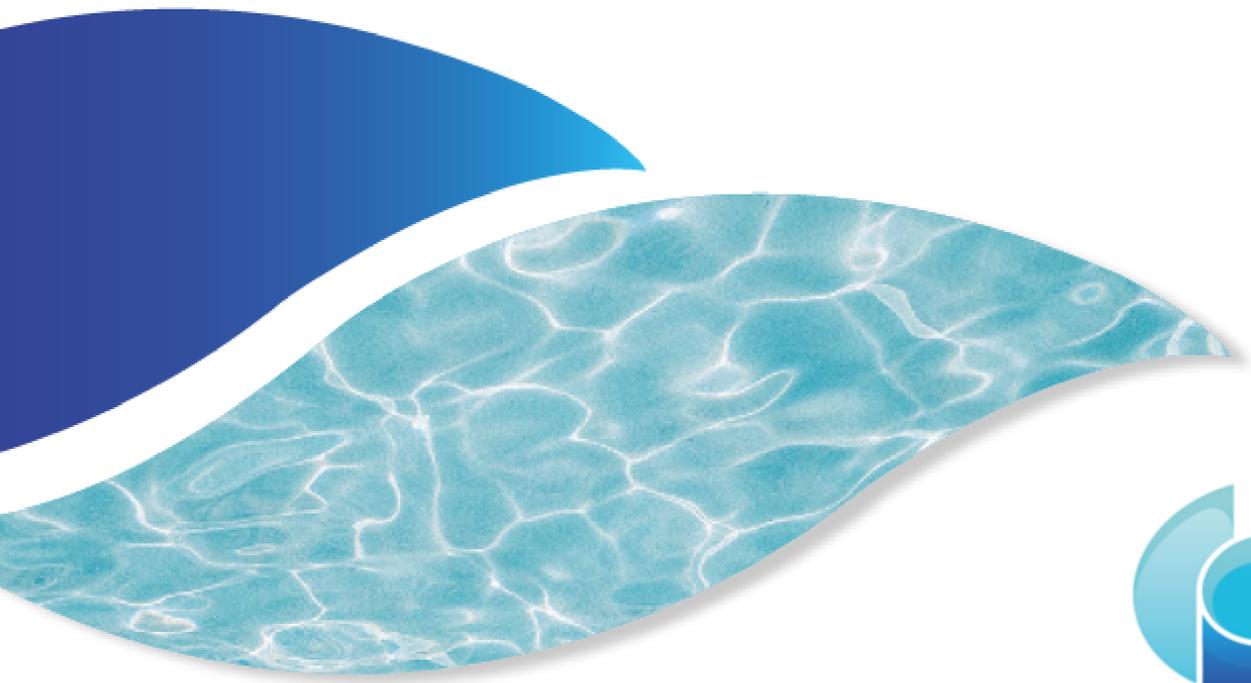

Can be connected to  
the Benisol Temperature  
controller

## Why Beniferro

Founded by Ir. Peemans R. who has many years experience in pools and pool technologies

Beniferro is a Belgian company that specializes in innovative plug and play pool-products, offering an added value to the end users. By producing and developing our products in Europe, we can guarantee high quality products. Our goal is to bring technology to everyone's swimming pool at a reasonable price. This for both Inground swimming pools and for surface-mounted swimming pools. With Beniferro we create the best and most convenient products focussing on automated maintenance, heating and water quality control of the swimming pool.

With experience in dropshipping, Beniferro offers excellent service for online retail websites. Besides this, wholesale customers also receive the right guidance when purchasing our products. It is also possible to buy our products and their spare parts on our website. Professional customers get a special login, with their specific conditions.

If you need any more information, our customer service will answer these. Contact us with the information below:
