Technical data sheet

Benisol Solar control

ZVZX6131-P

Product description and operation

The Benisol temperature controller will steer a 3-way solar valve. If the temperature of the solar heating is 4°C warmer than the Pool water, the benisol will turn the 3-way valve to the solar heating. If the water temperature is warmer than the solar heating surface, or if it reaches a set maximum of 32°C, the benisol will steer the water away from the solar heating.

Product specifications

Reference

Code	Type of equipment	Barcode	HS code export
ZVZX6131-P	Solar valve control	0650905861307	8481 8059

Technical :

Electrical input voltage	230 V
Electrical output voltage	230V
Maximum power	1100W
Temperature probes	2
Length temperature probes	1m (water) and 10m (air)
Connection ½ inch for water temp measurement	included
setting delta T water – solar surface temperature	4°C (adustable)
Setting maximum water temperature	32°C (adustable)
Possibility to convert solar conrol from 3-way to circulation pump control	Possible (see manual)
Possibility to convert the solar control to a Beniflow start-stop device based of flow	Possible (see manual)

Packaging :

Weight	650g
Packaging	White box
Box dimentions	11x15x16 cm ?????
Number of boxes per pallet	350 ???
